About Clean2go

Clean2go is a smart central management system, in the cloud, that optimizes and monitors the entire **cleaning and waste collection processes** in different streams, the system integrates an administrative "Dashboard" that includes an information dashboard, metrics and outputs. Providing tools for route planning and alerts on unusual events, data analysis, forecasting and recommendations in real time. Including weighing on the move, providing a **ONE STOP SHOP for cleaning management and waste collection** in municipal authorities, as part of the "smart cities" vision and for the **benefit of improving the service to residents.**

About Ok2go

The company was established in 2002, engaging in cloud solutions for a variety of applications for managing and controlling employee hours reports. The company developed and successfully implemented the system in about 230 authorities in the security departments. The company provides employee management solutions to thousands of businesses and over 100,000 users including leading companies and organizations

*Some of the capabilities are under development, *Some of the services are strictly dependent on the truck hardware

*The system is modular and you can take some or all of the services
